

Benefits to You From Attending This Workshop

- Take advantage of our instructors' experience in deciding how best to proceed with a project you may be currently considering.
- Learn a step-by-step approach to implementing efficiency and renewable projects through federal agency and utility partnerships.
- See how to take advantage of the lessons learned that other Federal customers have developed in trying to implement and finance energy and water efficiency projects.
- Gain an understanding of how to determine which utility energy services contract vehicle is most appropriate for you and learn how to customize the vehicles to fit your specific needs.
- Use private sector expertise, experience, and resources to solve long-term facility problems.
- Find out how to access experts and other valuable resources to help you evaluate and implement your utility projects.

Utility Energy Services Contracting (UESC) Projects Workshop

See how your facility can benefit from the energy and water efficiency improvement services offered by utilities in your state. Learn how innovative contracting and a partnership process can help solve your facility problems and meet your agency's goals and objectives.

**July 10-11, 2001
Chicago, IL**

Sponsored by:

UESC Projects Workshop

This workshop will provide attendees with an overview of the contracting options and services available from their local utility companies to engineer, finance, and install cost effective energy and water savings projects. Participants will be walked through the typical project process, from the audit phase to commissioning the equipment. Upon completing this workshop, participants will have the contracting and technical knowledge to begin a project at their facility. This innovative alternative financing opportunity provides a mechanism to help solve facility problems and meet program objectives and goals.

July 10, 2001 (8:30 a.m. - 4:30 p.m.)
July 11, 2001 (8:30 a.m. - 12:30 p.m.)

Instructors:

Karen Thomas
National Renewable Energy Laboratory

Deb Beattie, P.E.
National Renewable Energy Laboratory

Millard Carr, P.E., C.E.M.
Energy Management Solutions, Inc.

Linda Collins
General Services Administration

Who should attend?

Federal Project Implementation Teams including Facility/Energy Managers, Engineering Staff, Legal Staff, and Procurement and Contracting Officials are strongly encouraged to attend. Priority will be given to Federal personnel. However, state and local government customers are welcomed.

FEE: WAIVED

Why Attend?

More than 45 electric and gas utilities have provided comprehensive energy services and financing to implement efficiency and renewable energy projects and upgrades at federal facilities, investing more than \$600 million through UESC since 1995.

In fiscal year 2000, \$157 million in private sector investments generated \$35 million in savings at federal facilities. These projects are now paying for themselves from the cost savings resulting from the efficiency improvements.

The UESC project workshop will:

- Give energy managers and contracting officers a better understanding of utility financing options for accomplishing a range of efficiency and renewable energy projects.
- Present GSA's Areawide User's Manual and explain how to use this convenient contracting tool.
- Provide negotiating strategies to get the best deal for improving your facility's infrastructure.
- Give energy acquisition teams ways to sell the project to decision makers, and make the process easier.

Take advantage of this opportunity to ask the experts! Attendees are encouraged to bring information about their specific energy and water efficiency and renewable energy projects for workshop exercises and to get input from FEMP and GSA instructors.

Registration Information

The registration fee is waived for this workshop. Please call **FEMP's Workshop Hotline** at (703) 243-8343 by **June 29, 2001** to learn more about registering for this workshop. Course materials will be provided to all attendees.

This workshop is being hosted by Commonwealth Edison and will be held at the AT&T Building, 227 West Monroe, 10th Floor, Chicago. Registration is limited, so call **(703) 243-8343** to reserve your spot. You will be notified once your registration is confirmed.

The Department of Energy's (DOE) Federal Energy Management Program (FEMP) and the General Services Administration (GSA) are leading the way to energy efficiency, water conservation, and the use of renewable energy sources through partnerships, leveraged resources, technology transfer, and education.
